SPECIFICATION SHEET

PELTOR OPTIME III NECKBAND

- Optime III is a super-muff, and has been developed for use in extremely noisy environments.
- The protection is based on a technology with a double casing that minimises resonance in the holder casing. This results in maximum high-frequency muffling, while at the same time its still easy to understand speech and signals.
- An acoustic connection between the inner volume and the volume between the casings in its turn provides maximum low-frequency muffling.
- The sealing rings are broad and filled with soft plastic foam for the best fit and low contact pressure.
- Effective protection and best comfort are the hallmarks of Optime III.

SNR = 35dB, H = 40dB, M = 32dB, L = 23dB
