# SPECIFICATION SHEET

## COMBAT APPLICATION TOURNIQUET

- The Combat Application Tourniquet is a true one-handed tourniquet that completely occludes arterial and venous blood flow of an extremity in the event of a traumatic wound with significant haemorrhage.
- The Combat Application Tourniquet uses a windlass system with a free moving internal band to provide true circumferential pressure to the extremity. Once tightened and bleeding has stopped, the windlass is locked in place. A hook and loop® strap is then applied for further securing of the windlass during casualty evacuation.
- Quickly controls life-threatening extremity bleeding
- Small and lightweight

Packaging Waste	Type	Units	Weight(g)	Length(mm)	Width(mm)	Height(mm)
