

Note:

The drive can be connected to USB 3.1 GEN 1 / USB 3.0 and USB 2.0 ports.

For optimal performance the device must be connected to a USB 3.1 GEN 1 / USB 3.0 port.

Before first use, it is recommended to save all preloaded files from the device to your computer's internal hard drive.

For Mac users it is recommended to format the device in Mac OS Extended.

QUICK INSTALL GUIDE

Keypad Secure USB Drive

1906

1. Hardware Installation:

1. Connect the encrypted USB Drive to your computer.

2. Enter default passcode, then press **"Unlock"** button to confirm it. (Default passcode: "00000")

3. At this time the red LED should remain off and the green LED should be lit. The USB Drive has been unlocked successfully.

4. Open "My Computer" to see your external USB Drive is ready to use.

Note: For the security of your data we highly recommend changing the default passcode.

2. Change (Default) Passcode:

1. Press and hold **"Lock"** then connect the USB Drive with your computer until the red LED and orange LED light up. You now can release the **"Lock"** button.

2. Enter the existing passcode (Default passcode: "00000") and press **"Unlock"** to confirm. The orange LED will turn off.

3. Type your new passcode and confirm by pressing **"Unlock"**. The new passcode is now set.

Note: Passcode must be between 5 and 12 digits long.

4. To unlock your device retype your new passcode and press **"Unlock"**.

3. Erase USB Drive and set up a New Passcode:

1. Press and hold **"key 1 and 2"** simultaneously, then connect the USB Drive with your computer. Release both keys as soon as the red LED lights up.

2. Now press **"Lock"** for 5 seconds until the orange LED lights up.

3. Type your new passcode and confirm by pressing **"Lock"** and retype your new passcode and press **"Unlock"** the orange LED will turn off.

Note: Please back-up your data before setting a new passcode. For the safety of your data, setting a new passcode will initialise the USB Drive. To format the USB Drive please follow the steps under "Ready to use".

4. Retype your new passcode and press **"Unlock"**, the red LED turns off and is now unlocked.

4. Ready to use for Windows:

1. Click with the right mouse button on the "My Computer" icon on your desktop.
2. Select the option "Manage".
3. Select the option "Storage" -> "USB Drive Management".
4. Your system's USB Drive Management will automatically recognise a USB Drive not being initiated.
5. Choose GPT (GUID PARTITION TABLE) for the partition style and confirm by clicking "OK".

Since the USB Drive needs to be unlocked with every system start, choosing MBR is not recommended!

6. Choose the USB Drive, which is now "unallocated".

7. Click with the right mouse button on the "unallocated" area and select the option "New Partition". The "New Partition Wizard" opens.
8. The installation wizard will guide you through the formatting process.
9. Tip: The presets of this installation wizard do not necessarily need to be changed. You may just want to change the USB Drive's description and choice for a file system.
10. After the installation process has finished the USB Drive should appear again automatically showing the assigned drive letter and name.

5. Ready to use for MAC:

1. Once your USB Drive is connected to your Mac and unlocked, OSx will recognise an unreadable disk.

2. Select the button "Initialise..." to start Disk Utility.
3. In Disk Utility you need to select the specific external disk.

Please note that the Keypad Secure USB will lose its original type description, name and branding. To avoid false selections please disconnect other external volumes before implementing the next steps. Do not select any internal volumes.

4. Select the only external disk available.

5. Choose Erase from the Disk Utility tool bar to get to the formatting dialog box.

6. In the next dialog box you can assign a drive name and a file format.

7. Click on "erase" to start the formatting process.
