Acer DustShield

The accumulation of dust over time can cause a projector to not function properly and lose its original brightness.

Acer DustShield provides four guards – Sealed engine, Vertical Board, 3D dust filter and Lens shield to protect projector. With Acer Dust Shield, projectors can defend against the detrimental effects of dust,

Acer ColorSafe II

Acer ColorSafe II combines the Digital Micromirror Device (DMD, the chip at the heart of DLP technology) and dynamic RGB control techniques, and uses high-grade/quality projector lamps to extend Acer projectors' lifespan. ColorSafe II prevents yellow hues, the sign of color decay, so that color fidelity is preserved even after prolonged usage.

DLP 3D Ready

With DLP 3D ready, user can view any 120 Hz 3D frame sequential content from a PC with appropriate 120 Hz graphic card, 3D stereoscopic player, and any Blu-ray Disc title from a Blu-ray Disc (BD) player or HQFS 3D DVD title from an NTSC DVD player by wearing DLP 3D glasses.

Acer EcoProjection

Acer EcoProjection is an environment-friendly power management solution that reduces standby power dramatically. With ExtremeECO feature, projector will automatically enter ExtremeECO mode if there is no signal input. The power consumption can be reduced up to 70%.

About Acer

Since its founding in 1976, Acer has broken barriers between people and technology, enabling people to explore beyond limits. Acer ranks No. 2 for notebook PCs globally (Gartner data 2011). The Acer Group employs 8,000 people across the globe, and revenues for 2011 reached US\$15.7 billion.

Acer's channel business model is instrumental to the company's success, while its multi-brand approach integrates Acer, Gateway, and Packard Bell brands in worldwide markets. Acer designs environmentally friendly products and, with its vendors, has established a green supply chain.

Acer is proud to be a Worldwide Partner of the Olympic Movement. That includes supporting the Vancouver 2010 Olympic Winter Games and London 2012 Olympic Games.
