

**Conference Rail System PRO. Glider set for PRO boards incl. wall distance holder**

This three channel rail allows you to slide boards underneath one another, therefore enabling flexible presentations on several levels: upper and lower glider channel plus clamping rail. This space saving solution is made possible by the special glider set. Compatible with all PRO boards as an alternative to the standard PRO rail system.

Conference Rail System PRO. Glider set for PRO boards incl. wall distance holder. This is a multi-use system with an unlimited variety of combinations. Offering ultimate flexibility. The simple, extremely robust design enables a smooth and fast assembly. The attractive appearance ideally adapts to every interior design. The space saving system allows each element to be slid over each other. Special safety slides ensure effortless rail guidance and enables boards not to accidentally slip from rail during use. Rails are made of silver anodised aluminium.
