**Hardware Connection**

Plug the USB cable into the computer’s USB port and the hub is ready to use.

Usage Tips: 1. The TP-Link USB 3.0 hub is plug-and-play and requires no driver for Windows, Mac OS X or Linux systems.
2. The LED will light up when the corresponding USB port is connected to a USB device.

---

**Using the Hub**

This hub provides your computer with 4 additional USB 3.0 ports for super-speed USB 3.0 connections.

Usage Tips:
1. The USB 3.0 ports are also compatible with USB 2.0 and USB 1.1 specifications.
2. The USB 3.0 ports transfer data at a rate up to 5Gbps, but the actual rate is limited by the USB transfer rate of the connected devices.
3. The performance of 2.4GHz wireless devices (wireless keyboards, mouses, etc.) may be affected when they are working too close to the USB 3.0 hub.

---

**Safety Information**

- When product has power button, the power button is one of the way to shut off the product; when there is no power button, the only way to completely shut off power is to disconnect the product or the power adapter from the power source.
- Don’t disassemble the product, or make repairs yourself. You run the risk of electric shock and voiding the limited warranty. If you need service, please contact us.
- Avoid water and wet locations.

**FCC & CE**

**FCC STATEMENT**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1) This device may not cause harmful interference.
2) This device must accept any interference received, including cause undesired operation.
Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

**CE Mark Warning**

This is a class B product. In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.
