*devolo*

High-speed Wi-Fi

1x Gigabit LAN

## Extend your Wi-Fi range! Incredibly easy set-up, faster Wi-Fi!

More Wi-Fi in no time! The WiFi ac Repeater from devolo lets you boost your router's Wi-Fi signal to create a stable connection, even in rooms where a connection used to be impossible, and it does this at top-end data rates of up to 1200 Mbps. Enjoy your video calls, streaming films, music and Internet browsing free of interruptions, annoying delays and never-ending progress 'buffer' bars from now on.

Setting up the devolo WiFi ac Repeater is as easy as pie. Thanks to its compact design, you can place the WiFi ac Repeater virtually anywhere. Subsequent configuration can be carried out automatically using the integrated WPS button or a web browser. Within just a few minutes, you can vastly improve your Wi-Fi reception—or set up an entirely new Wi-Fi network with ease since the repeater can optionally be used as an access point as well.

The strength of the current signal is always displayed by the helpful LED indicator on the repeater. The repeater is also equipped with a gigabit Ethernet port for connecting cable-based end devices, such as smart TVs, PCs, streaming boxes and NAS drives. Take advantage of the flexible possibilities of the devolo WiFi ac Repeater and start enjoying fast Wi-Fi ac speed and gigabit Ethernet wherever you need it. Give your Wi-Fi network the power to easily handle the exciting multimedia possibilities of today and tomorrow.

devolo WiFi ac Repeater
