

USB-C VGA Multiport Adapter - USB 3.0 Port - 60W PD

Product ID: CDP2VGAUACP

This USB-C VGA multiport adapter combines the capability of two single-function adapters, a USB-C video adapter and USB-C to USB adapter, into a portable docking station for your laptop. You can instantly connect to a VGA display and a USB 3.0 (Type-A) device, while also powering and charging your laptop using the same adapter.

Powers and Charges Your Laptop

With USB Power Delivery, you can power and charge your laptop by simply connecting the multiport adapter to your laptop's USB Type-C port, then connecting a USB Type-C power adapter.

Universal Compatibility

The USB-C multiport adapter features a built-in USB-C cable and works with USB-C equipped MacBook, Chromebook™ and Windows laptops that support DisplayPort (DP) Alt Mode and USB Power Delivery.

Rugged and Portable

Compact, lightweight design and rugged construction lets you take this USB-C video adapter anywhere you take your laptop.
