

Powering and Connecting Your World

NEW PRODUCT ANNOUNCEMENT

Surge Protectors & Power Strips for Home/Office

Protect It!® Surge Protectors and Power Strips Add Outlets to a Workspace

Protect It! products distribute power and protect against power overloads.

Perfect for:

Offices, workshops and other spaces with multiple AC-powered devices.

Tripp Lite's new Protect It!® surge protectors and power strips distribute 230V power safely and reliably to electronics, appliances, power tools and other electrical equipment. By powering multiple devices from a single AC power source, they allow you to operate more equipment where wall outlets are scarce, hidden behind desks or otherwise difficult to reach.

Designed to fit into a variety of workspace layouts, these products will help you organize your office to best accommodate your workflow, and will protect equipment against power overloads.

Key Benefits

POWER DISTRIBUTION

- Multiple Type F Schuko outlets let you distribute power to as many as six devices from a single AC power source.
- Select models provide dual USB-A ports with 5V/2,1A for charging mobile devices.

DEVICE PROTECTION

- 16A circuit breaker shuts down outlets in case of a power overload to protect connected equipment.
- Surge protectors are rated to 250 joules to protect connected equipment against power surges and spikes.
- On/Off switch on select models provides one-touch control of power to all connected devices.
- Diagnostic LED on select models indicates whether power is passing through the surge protector or strip.

CONVENIENT PLACEMENT OPTIONS

- Up to 3 m cord length provides a wider range of placement options away from the AC outlet.
- Direct plug-in TLP1G model provides a protective outlet with a minimal footprint for tight spaces.
- Mounting tabs on TLP6G18USB model help attach it to walls, workbenches and the underside of desks.

DURABLE DESIGN

- Strong plastic housing withstands the wear and tear of every day use.

Feature Focus

A Schuko Outlets

German Type F outlets distribute power to as many as 6 devices.

B Surge LED

Indicator light verifies protection against powerful surges and spikes.

C One-Touch Control

On/Off switch (with LED rocker on select models) controls power to connected devices and easily resets the 16A circuit breaker.

D Device Charging

Dual USB-A ports provide 5V/2,1A of charging power.

Additional Features

Schuko plug for German-style outlets.

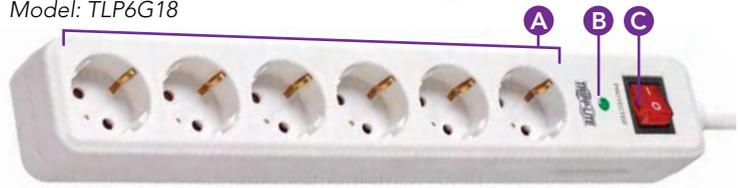

Pull-out mounting tabs on TLP6G18USB for convenient placement.
