## Safety

### **National Conventions**

The following subsections describe notational conventions used in this document.

#### Notes, Cautions, and Warnings

Throughout this guide, blocks of text may be accompanied by an icon and printed in bold type or in italic type. These blocks are notes, cautions, and warnings, and they are used as follows:

### V

NOTE: A NOTE indicates important information that helps you make better use of your computer system.

### ⚠

**CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

### Δ

**WARNING:** A WARNING indicates the potential for bodily harm and tells you how to avoid the problem. Some warnings may appear in alternate formats and may be unaccompanied by an icon. In such cases, the specific presentation of the warning is mandated by regulatory authority.

### Power

The monitor should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.

The monitor is equipped with a three-pronged grounded plug, a plug with a third (grounding) pin. This plug will fit only into a grounded power outlet as a safety feature. If your outlet does not accommodate the three-wire plug, have an electrician install the correct outlet, or use an adapter to ground the appliance safely. Do not defeat the safety purpose of the grounded plug.

Unplug the unit during a lightning storm or when it will not be used for long periods of time. This will protect the monitor from damage due to power surges.

🛕 Do not overload power strips and extension cords. Overloading can result in fire or electric shock.

To ensure satisfactory operation, use the monitor only with UL listed computers which have appropriate configured receptacles marked between 100-240V AC, Min. 5A.

 $\Lambda$  The wall socket shall be installed near the equipment and shall be easily accessible.

### Installation

Do not place the monitor on an unstable cart, stand, tripod, bracket, or table. If the monitor falls, it can injure a person and cause serious damage to this product. Use only a cart, stand, tripod, bracket, or table recommended by the manufacturer or sold with this product. Follow the manufacturer's instructions when installing the product and use mounting accessories recommended by the manufacturer. A product and cart combination should be moved with care.

Never push any object into the slot on the monitor cabinet. It could damage circuit parts causing a fire or electric shock. Never spill liquids on the monitor.

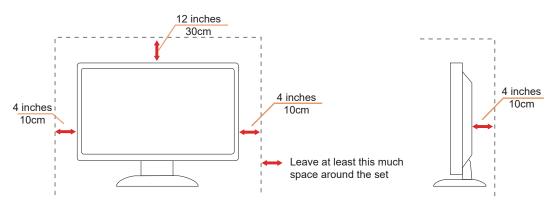

No not place the front of the product on the floor.

If you mount the monitor on a wall or shelf, use a mounting kit approved by the manufacturer and follow the kit instructions.

Leave some space around the monitor as shown below. Otherwise, air-circulation may be inadequate hence overheating may cause a fire or damage to the monitor.

To avoid potential damage, for example the panel peeling from the bezel, ensure that the monitor does not tilt downward by more than -5 degrees. If the -5 degree downward tilt angle maximum is exceeded, the monitor damage will not be covered under warranty.

See below the recommended ventilation areas around the monitor when the monitor is installed on the wall or on the stand:

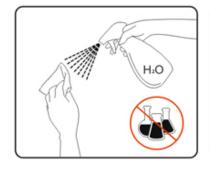

#### Installed with stand

### Cleaning

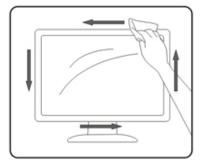

Clean the cabinet regularly with a water-dampened, soft cloth.

When cleaning use a soft cotton or microfiber cloth. The cloth should be damp and almost dry, do not allow liquid into the case.

Please disconnect the power cord before cleaning the product.

### Other

If the product is emitting a strange smell, sound or smoke, disconnect the power plug IMMEDIATELY and contact a Service Center.

A Make sure that the ventilating openings are not blocked by a table or curtain.

1 Do not engage the LCD monitor in severe vibration or high impact conditions during operation.

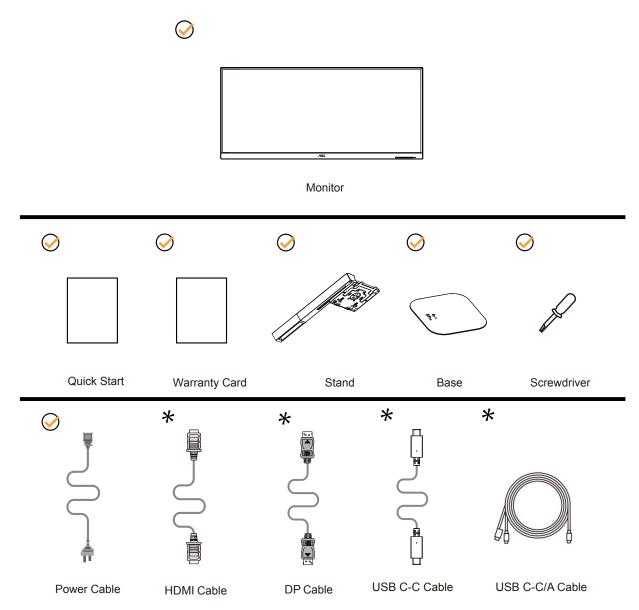

Do not knock or drop the monitor during operation or transportation.

The power cords shall be safety approved. For Germany, it shall be H03VV-F, 3G, 0.75 mm2, or better. For other countries, the suitable types shall be used accordingly.

Excessive sound pressure from earphones and headphones can cause hearing loss. Adjustment of the equalizer to maximum increases the earphones and headphones output voltage and therefore the sound pressure level.

Setup

### **Contents in Box**

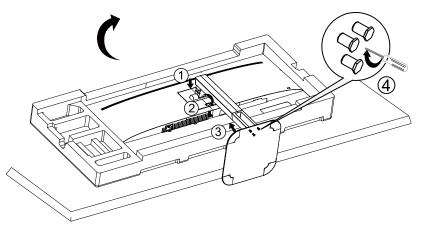

Not all signal cables will be provided for all countries and regions. Please check with the local dealer or AOC branch office for confirmation.

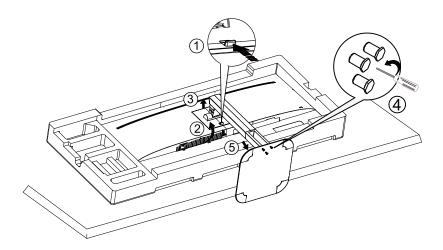

### Setup Stand & Base

Please setup or remove the base following the steps as below.

#### Setup:

#### Remove:

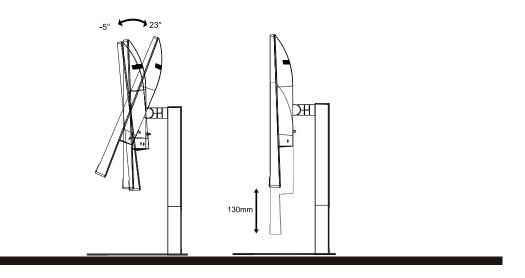

### **Adjusting Viewing Angle**

For optimal viewing it is recommended to look at the full face of the monitor, then adjust the monitor's angle to your own preference.

Hold the stand so you will not topple the monitor when you change the monitor's angle.

You are able to adjust the monitor as below:

### 

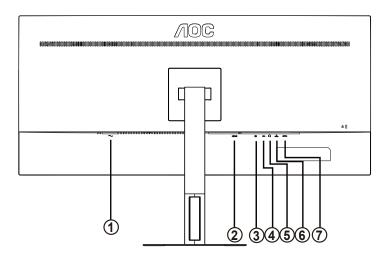

Do not touch the LCD screen when you change the angle. Touching the LCD screen may cause damage.

#### Warning:

- 1. To avoid potential screen damage, such as panel peeling, ensure that the monitor does not tilt downward by more than -5 degrees.
- 2. Do not press the screen while adjusting the angle of the monitor. Grasp only the bezel.

### **Connecting the Monitor**

Cable Connections In Back of Monitor:

- 1. Power
- 2. HDMI
- 3. DP
- 4. USB C
- 5. Earphone
- 6. USB3.2 Gen1+chargingx1 USB3.2 Gen1x1
- 7. USB3.2 Gen1x2

#### Connect to PC

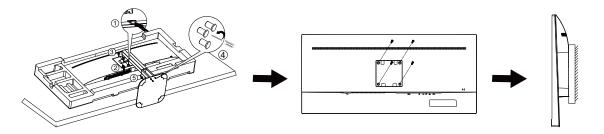

- 1. Connect the power cord to the back of the display firmly.
- 2. Turn off your computer and unplug its power cable.
- 3. Connect the display signal cable to the video connector on your computer.
- 4. Plug the power cord of your computer and your display into a nearby outlet.
- 5. Turn on your computer and display.

If your monitor displays an image, installation is complete. If it does not display an image, please refer Troubleshooting.

To protect equipment, always turn off the PC and LCD monitor before connecting.

### Wall Mounting

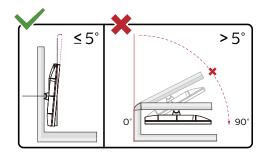

Preparing to Install An Optional Wall Mounting Arm(Screw diameter is M4 and length is 10mm).

This monitor can be attached to a wall mounting arm you purchase separately. Disconnect power before this procedure. Follow these steps:

- 1. Remove the base.
- 2. Follow the manufacturer's instructions to assemble the wall mounting arm.
- 3. Place the wall mounting arm onto the back of the monitor. Line up the holes of the arm with the holes in the back of the monitor.
- 4. Reconnect the cables. Refer to the user's manual that came with the optional wall mounting arm for instructions on attaching it to the wall.

W Noted: VESA mounting screw holes are not available for all models, please check with the dealer or official department of AOC.

\* Display design may differ from those illustrated.

#### Warning:

- 1. To avoid potential screen damage, such as panel peeling, ensure that the monitor does not tilt downward by more than -5 degrees.
- 2. Do not press the screen while adjusting the angle of the monitor. Grasp only the bezel.

### AMD FreeSync function (Available for selective models)

- 1. AMD FreeSync function is working with DP/HDMI/USB C
- 2. Compatible Graphics Card: Recommend list is as the below, also could be checked by visiting www.AMD.com

#### **Graphics Cards**

- Radeon™ RX Vega series
- Radeon<sup>™</sup> RX 500 series
- Radeon<sup>™</sup> RX 400 series
- Radeon™ R9/R7 300 series (R9 370/X, R7 370/X, R7 265 except)
- Radeon<sup>™</sup> Pro Duo (2016)
- Radeon<sup>™</sup> R9 Nano series
- Radeon™ R9 Fury series
- Radeon™ R9/R7 200 series (R9 270/X, R9 280/X except)

#### Processors

- AMD Ryzen<sup>™</sup> 7 2700U
- AMD Ryzen<sup>™</sup> 5 2500U
- AMD Ryzen<sup>™</sup> 5 2400G
- AMD Ryzen<sup>™</sup> 3 2300U

## Adjusting

### Hotkeys

1	Source/Exit			
2	Clear Vision/<			
3	Volume/>			
4	Menu/Enter			
5	Power			

#### Power

Press the power key to turn on/off the monitor.

#### Menu/Select

Activate the OSD menu or function adjustment confirmation.

#### Volume / increase

When the OSD menu is closed, press the ">" key to open the volume adjustment bar, and press the "<" or ">" key to adjust the headphone output volume.

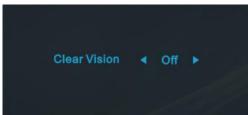

#### Source switching/exit

When the OSD menu is off, press this key to activate the signal source switching function, press this key continuously to select the signal source displayed in the information bar, and press the menu key to adjust to the selected signal source. When the OSD menu is active, this button acts as an exit key (to exit the OSD menu)

**Clear Vision** 

1. When there is no OSD, Press the "<" button to activate Clear Vision.

2. Use the "<" or ">" buttons to select between weak, medium, strong, or off settings. Default setting is always "off".

3. Press and hold "<" button for 5 seconds to activate the Clear Vision Demo, and a message of "Clear Vision Demo: on" will be display on the screen for a duration of 5 seconds. Press Menu or Exit button, the message will disappear. Press and hold "<" button for 5 seconds again, Clear Vision Demo will be off.

Clear Vision function provides the best image viewing experience by converting low resolution and blurry images into clear and vivid images.

Clear Vision	Off	
	Weak	
	Medium	Adjust the Clear Vision
	Strong	
Clear Vision Demo	On or Off	Disable or Enable Demo

### **OSD Setting**

Basic and simple instruction on the control keys.

<	Color Setup	Picture Boost	OSD Setup	PIP PIP Setting	Game Setting	) Extra	Exit
Contrast							
Brightness			DCR	Off			
Eco mode			HDR Mode	Off			

- 1. Press the III MENU-button to activate the OSD window.
- Press < Left or > Right to navigate through the functions. Once the desired function is highlighted, press the III MENU-button to activate it, press < Left or > Right to navigate through the sub-menu functions. Once the desired function is highlighted, press IIII MENU-button to activate it.
- 3. Press < Left or > to change the settings of the selected function. Press + to exit. If you want to adjust any other function, repeat steps 2-3.
- OSD Lock Function: To lock the OSD, press and hold the III MENU-button while the monitor is off and then press
   () power button to turn the monitor on. To un-lock the OSD press and hold the III MENU-button while the monitor is off and then press
   () power button to turn the monitor on.

#### Notes:

- 1. If the product has only one signal input, the item of "Input Select" is disable to adjust.
- 2. If the product screen size is 4:3 or input signal resolution is native resolution, the item of "Image Ratio" is disabled.
- 3. DCR and Picture Boost, for these states that only one state can exist

#### Luminance

<	Color Setup	Picture Boost	OSD Setup	PIP PIP Setting	Game Setting	) Extra	Exit
Contrast							
Brightness			DCR	Off			
Eco mode			HDR Mode	Off			

	Contrast	0-100		Contrast from Digital-register.			
	Brightness	0-100		Backlight Adjustment			
		Standard		Standard Mode			
		Text	Т	Text Mode			
		Internet	e	Internet Mode			
		Game		Game Mode			
	Eco mode	Movie	0	Movie Mode			
		Sports	R	Sports Mode			
		Reading	R	Reading Mode			
~~~		Uniformity	#	Uniformity Mode			
		Gamma1		Adjust to Gamma 1			
	Gamma	Gamma2		Adjust to Gamma 2			
		Gamma3		Adjust to Gamma 3			
	DOD	Off		Disable dynamic contrast ratio			
	DCR	On		Enable dynamic contrast ratio			
		Off					
	HDR Mode	HDR Picture		Optimized for the color and contrast of the picture,			
		HDR Movie		which will simulate showing the HDR effect.			
		HDR Game		1			

#### Note:

When "HDR Mode" is set to "non-off", the items "Contrast", "Eco mode", "Gamma" cannot be adjusted.

### **Color Setup**

### **LED Indicator**

Status	LED Color
Full Power Mode	White
Active-off Mode	Orange

## Troubleshoot

Problem & Question	Possible Solutions
Power LED Is Not ON	Make sure the power button is ON and the Power Cord is properly connected to a grounded power outlet and to the monitor.
No images on the screen	<ul> <li>Is the power cord connected properly? Check the power cord connection and power supply.</li> <li>Is the cable connected correctly? (Connected using the HDMI cable) Check the HDMI cable connection. (Connected using the DP cable) Check the DP cable connection.</li> <li>* HDMI/DP input is not available on every model.</li> <li>If the power is on, reboot the computer to see the initial screen (the login screen.) If the initial screen (the login screen) appears, boot the computer in the applicable mode (the safe mode for Windows 7/8/10) and then change the frequency of the video card. (Refer to the Setting the Optimal Resolution) If the initial screen (the login screen) does not appear, contact the Service Center or your dealer.</li> <li>Can you see "Input Not Supported" on the screen? You can see this message when the signal from the video card exceeds the maximum resolution and frequency that the monitor can handle properly. Adjust the maximum resolution and frequency that the monitor can handle properly.</li> <li>Make sure the AOC Monitor Drivers are installed.</li> </ul>
Picture Is Fuzzy & Has Ghosting Shadowing Problem	Adjust the Contrast and Brightness Controls. Press hot-key (AUTO) to auto-adjust. (Available for selective models) Make sure you are not using an extension cable or switch box. We recommend plugging the monitor directly to the video card output connector on the back.
Picture Bounces, Flickers Or Wave Pattern Appears In The Picture	Move electrical devices that may cause electrical interference as far away from the monitor as possible. Use the maximum refresh rate your monitor is capable of at the resolution you are using.
Monitor Is Stuck In Active Off- Mode"	The Computer Power Switch should be in the ON position. The Computer Video Card should be snugly fitted in its slot. Make sure the monitor's video cable is properly connected to the computer. Inspect the monitor's video cable and make sure no pin is bent. Make sure your computer is operational by hitting the CAPS LOCK key on the keyboard while observing the CAPS LOCK LED. The LED should either turn ON or OFF after hitting the CAPS LOCK key.
Missing one of the primary colors (RED, GREEN, or BLUE)	Inspect the monitor's video cable and make sure that no pin is damaged. Make sure the monitor's video cable is properly connected to the computer.
Screen image is not centered or sized properly	Adjust H-Position and V-Position or press hot-key (AUTO).
Picture has color defects (white does not look white)	Adjust RGB color or select desired color temperature.
Horizontal or vertical disturbances on the screen	Use Windows 7/8/10/11 shut-down mode to adjust CLOCK and FOCUS. Press hot-key (AUTO) to auto-adjust. (Available for selective models)
Regulation & Service	Please refer to Regulation & Service Information which is in the CD manual or www.aoc.com (to find the model you purchase in your country and to find Regulation & Service Information in Support page.

## **Specification**

### **General Specification**

	Model Name	U34V5C/BK

9	ML_Lane 1 (p)	19	Return DP_PWR
10	ML_Lane 0 (n)	20	DP_PWR

### **Plug and Play**

#### Plug & Play DDC2B Feature

This monitor is equipped with VESA DDC2B capabilities according to the VESA DDC STANDARD. It allows the monitor to inform the host system of its identity and, depending on the level of DDC used, communicate additional information about its display capabilities.

The DDC2B is a bi-directional data channel based on the I2C protocol. The host can request EDID information over the DDC2B channel.
