

UNILUX

MOOVE

The MOOVE stool promotes with its curved foot, a dynamic posture and allows greater freedom of movement and thus will help you to adopt a good position.

It is ideal to avoid back, lumbar and muscle pain (shoulders, arms, back).

MOOVE

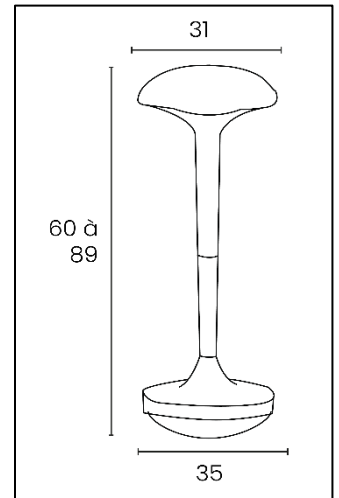

- **Fight against a sedentary lifestyle:** sitting will increase the risk of having heart problems while reducing life expectancy by 7 years. Indeed, the human body is designed to “move”, not to stay in a still position for 9 hours a day.
- **Well-being:** promotes a dynamic posture and provides great freedom of movement allowing you to adopt the correct posture without hindering movements.
- **Ergonomic:** ideal for avoiding back, lumbar and muscle pain (shoulders, arms, back). Thanks to perfect alignment of the spine, the whole body “benefits”.
- **Ergonomic and comfortable seat:** triangular padded foam seat (thickness 8 cm) in high-density fabric for optimal comfort and well-being (width 31 cm).
- **Variable adjustment:** easily adjustable height (63-89 cm) thanks to its gas piston system and its 3 easy-access adjustment handles located under the seat. Whether seated or semi-standing, be dynamic throughout your working day.
- **Stability:** weighted non-slip base for better grip on different types of ground in complete safety.
- **Complementary Products:** Recommended for use with the ERGODESK 2 Sit/Stand Station or the ERGO WELL Electric Lift Desk.

Reasonable weight: 10.5 kg

Load capacity: can support a weight of up to 150kg

Materials: metal tube with metal grey epoxy paint/ PP and rubber base/ fabric seat

Characteristics

SAP no.	400110242
Color	Black
Dimensions	63 cm x 35 cm
Warranty	2 years
Net weight	10,5
EAN code	3595560028092

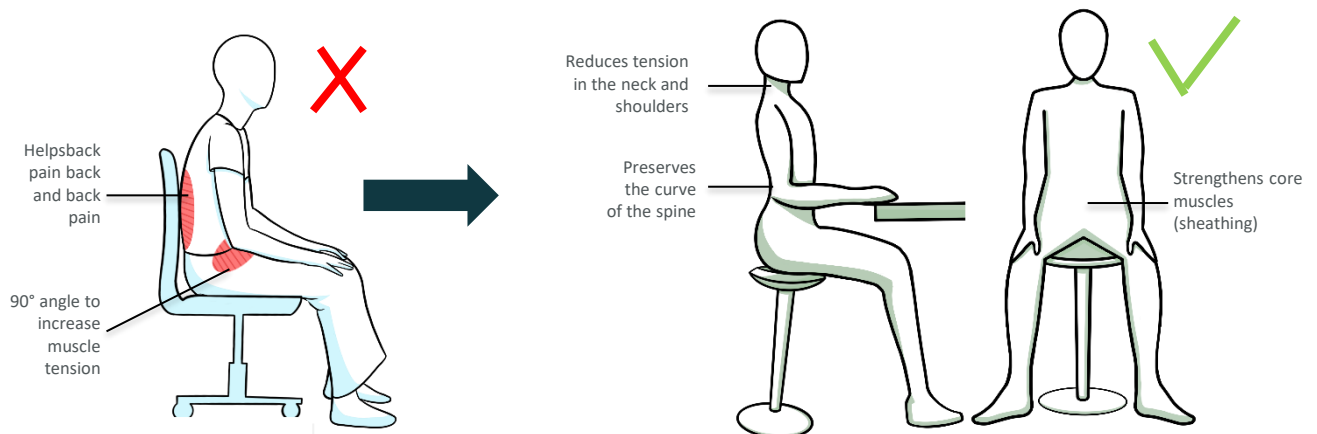

OUR CSR COMMITMENTS

1. All our lighting are **100% repairable** thus limiting planned obsolescence.
2. Reduce our carbon footprint through our **ECO-DESIGN THINKING** approach.
3. Contribute to the preservation of the planet's natural resources by promoting the use of **recycled materials**.
4. Optimize our packaging to control our **transport costs**.
5. Highlight the **talent of our employees** by ensuring social equality.

OUR EXPERTISE

Lutter contre la sédentarité

Following numerous studies, sitting will increase the risk of having heart problems while reducing life expectancy by 7 years. Indeed, the human body is designed to “move”, and not to remain almost still for 9 hours a day. Ultimately, this position disrupts the entire body (less well oxygenated) which leads to an increase in fat cells causing potential excess weight. Ideal for avoiding back, lumbar and muscular pain (shoulders, arms, back), our range of dynamic seats is designed to promote good posture in your spine by inducing the tilt of your pelvis and forming an open angle of 110° between your thighs and your spine, thereby reducing the tension exerted on your pelvic muscles. This natural posture prevents back pain and improves your muscle tone without hindering your movements.

OUR CERTIFICATIONS

Unilux is committed to an eco-responsible approach and ensures that its products respect this commitment. Indeed, we are very concerned about current environmental issues and we aspire to respond as best as possible to the concerns of our consumers on this subject. Sustainable development is at the heart of our strategy and we act for the environment. You will find below the different certifications that Unilux has and that prove its environmental commitment.

30 products available on pCon Planner

You will be able to obtain data on many UNILUX or OFML standard products and integrate them quickly and easily into 3D space layouts via pCon.
