

MULTI - FUNCTION RUGGED CASE

techor
function with emotion

INSTALLATION GUIDE

Step 1

Unlock the clips along the edges to remove the front of the case

Step 2

Remove silicone bumpers from the corners.

Step 3

(If you don't use the shoulder strap, please skip this step).

Thread the string through the openings, tie a knot and buckle up.

Step 4

Place the device in the back of the case and ensure it is not upside down.

Put the bumpers back onto the corners and make sure the edges and cutouts are in place.

Step 5

Correct installation

Accurately place the volume key rubber and make sure that the silicone rubber goes through the PC hole position illustrated above.

Incorrect installation

Didn't put the volume key rubber into the PC frame.

Step 6

Remove the blue film from the screen protector and place the front of the case back on. Press along the edges until all of the clips have firmly locked.
