

TRADESMAN 2F

BUILT TO FLOAT. BUILT TO LAST.

Whether you're on-site, off-grid, or out on the water, the JCB Tradesman 2F is the no-nonsense rugged phone that keeps going, and floating, when the unexpected happens.

Built for real-world durability with the maximum water and dust protection (IP69K) and military grade rugged credentials (MIL-STD-810H), this ultra-tough 4G feature phone combines essential connectivity with practical design, including large physical buttons for gloved use and adjustable on-screen text for better visibility.

The result? A dependable device that's easy to use and hard to break.
It's not a smartphone. It's a survivor.

Key features

It floats

Dropped in the sea, a river or a swimming pool? No problem. The Tradesman 2F is designed to float, giving you time to retrieve it and carry on.

Essential Connectivity

With 4G and VoLTE support, dual SIM slots and strong signal reception, the Tradesmen 2F keeps you connected in remote or demanding environments.

Expandable Storage

With support for up to 128GB of external storage via MicroSD, users can store essential photos, videos, and documents directly on the device.

Tougher than your day

Certified to IP69K and tested to military standard MIL-STD-810H, the Tradesman 2F shrugs off drops from up to 1.8 metres and keeps going through dust, water and high-pressure jet washing.

Made for the job

Large, glove-friendly buttons, the option to enlarge text on screen, and a speed dial function for key contacts make it easy to operate in challenging conditions. A bright, top-mounted torch is always ready to light the way.
