A photograph showing a Chapin stainless steel sprayer in the foreground, with workers in the background. The sprayer is a silver, cylindrical tank with a black pump handle and a black hose. It has a label that reads "Stainless Steel Xtreme". The workers are wearing blue jeans and rubber boots, and are standing on a muddy surface. The background is slightly out of focus, showing the workers' legs and the ground.

Trust the legacy...

In 1884, American homes were still illuminated with kerosene lamps and lanterns. In Oakfield, New York, young Ralph E. Chapin sold kerosene at the hardware store he ran with his brother-in-law, Frank Harris. But something bothered Ralph Chapin. Many of the cans his customers brought in to be filled with kerosene were so poorly made that they often leaked. So Mr. Chapin began making his own cans and selling them to his customers.

The demand for this product was so great that Mr. Chapin soon sold his hardware store and set up a manufacturing business in nearby Batavia. The company quickly expanded and began making 55-gallon storage tanks and pumps. In 1903, Chapin began making compressed air sprayers and hand sprayers.

Today, Chapin sprayers are still made from the best materials and exceed the most exacting industry standards. And Chapin products continue to perform safely and dependably, providing years of reliable service. Just as they have since 1884. Learn more about the Chapin legacy and full line of products at chapinmfg.com.

Chapin Industrial Concrete Sprayers

And what you should know about them

Chapin Industrial sprayers are equipped with **Viton®** seals and gaskets to handle the many aggressive chemicals used by professionals. To accommodate the chemical compositions and the higher solids in today's solvents and excellerators, select Chapin Industrial concrete sprayers are equipped with **Xtreme®** seals and gaskets that are resistant to the most extreme chemicals and concentrations of Acetone®, Naphtha®, Xylene® and Toluene®. These models display the large X on the tank. Chapin Industrial sprayers are equipped with brass shut-offs and extensions. Each have a Lock-on feature. **A red lock-on feature** indicates that the shut-off contains **Xtreme®** Seals to handle more corrosive chemicals.

Many of Chapin's industrial sprayers offer **heavy duty die cast metal pump handles** that stand up to the everyday abuse professionals can dish out. Oversized brass pump cylinders allow for quick compression and long life. Ergonomically designed pump handles help professionals get the job done minimizing fatigue.

Chapin's metal TriPoxy® and stainless steel industrial sprayers are designed with our unique **Tri-Lock™** seal that ensures the pump cap tightly locks onto the tank, making positive contact with the o-ring for a tight, leak-proof seal.

Tri-Poxy® coating lines the interior of all Chapin steel tanks (excluding stainless steel tanks). This photo shows the tank being crushed. Note that the coating did not crack, flake, or chip under the extreme stress on the metal.

Poly Sprayer

Light in weight, heavy on features Preferred by professionals for their light weight yet rugged durability, our Industrial Poly lineup contains a sprayer that fits the concrete professional's needs. With innovative features like automatic pressure relief valves, 18" brass shut-offs and extensions, metal pump handles and durable polyethylene 3 gallon tanks, these sprayers are ideal for the budget conscious contractor. Like their TriPoxy brothers, the 19049 and 19149, the 22049XP and 22149XP Poly Sprayers are built to handle more corrosive chemicals without breaking down. Xtreme® seals and gaskets, brass shut-off/extension and large mouth opening make these the toughest Chapin Industrial Poly sprayers in the Poly lineup.

Decorative Concrete

Acetone Dye

As acetone dyes increase in popularity, professionals require the tools that improve their productivity and make the job easier. Chapin has developed a line of Acetone Sprayers that gives professionals the flexibility and control they need to apply acetone dye consistently for exceptional results. The 2 and 3 gallon models come with a ceramic nozzle (0.13 gpm) for professional spray results and exceptional control.

Equipped with acetone resistant seals and gaskets

21127XP / 26127 / 10027

Professional Pest Control

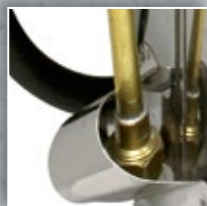

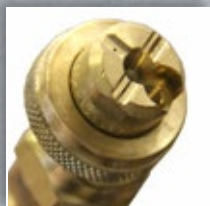

These sprayer have the features P.C.O. professionals require. Each is equipped with large openings for easy filling. Chapin's unique Tri-lock® design ensures a pressure tight seal. With die cast metal pump handle and brass pump cylinders these sprayers are built to withstand daily use. The dripless trigger style shut-off helps avoid unwanted drips. Professional grade stainless steel tanks clean easily and are resistant to pesticides. 10800 includes a multi-tip brass nozzle with crevice injector attachment for precise applications. 10700 includes a poly fan nozzle. Both models include a built-in holster to store the wand for transport.

Professional Specialty

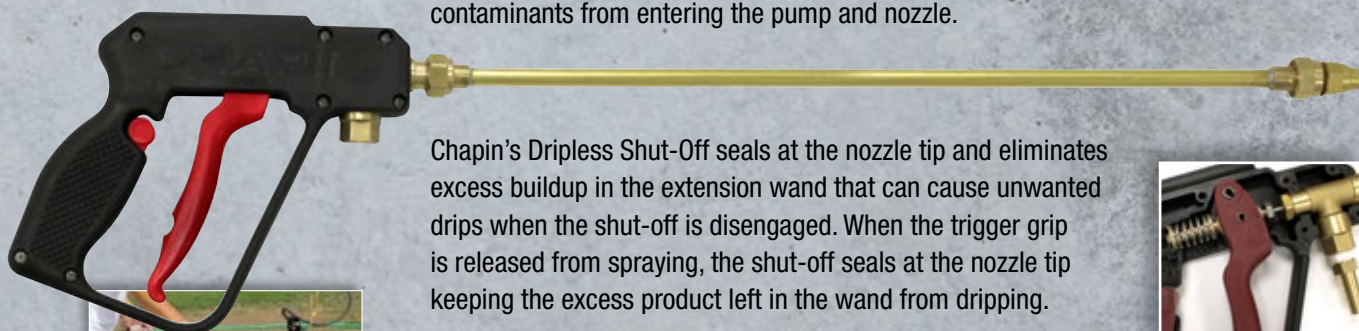

6002 Slide Sprayer

Chapin's all brass pump slide sprayer is a versatile spraying solution when spray distance is a challenge. Just drop the weighted filter end into a bucket and spray up to 45 vertical feet using the brass slide pump. An adjustable brass nozzle is included to control the spray pattern and a built-in filter keeps contaminants from entering the pump and nozzle.

6002
Slide Sprayer
Brass pump
84" Hose
Weighted strainer filter
Reaches up to 45 ft

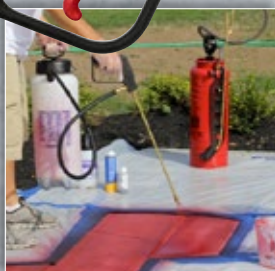

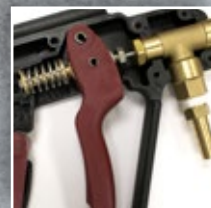

Dripless Spraying

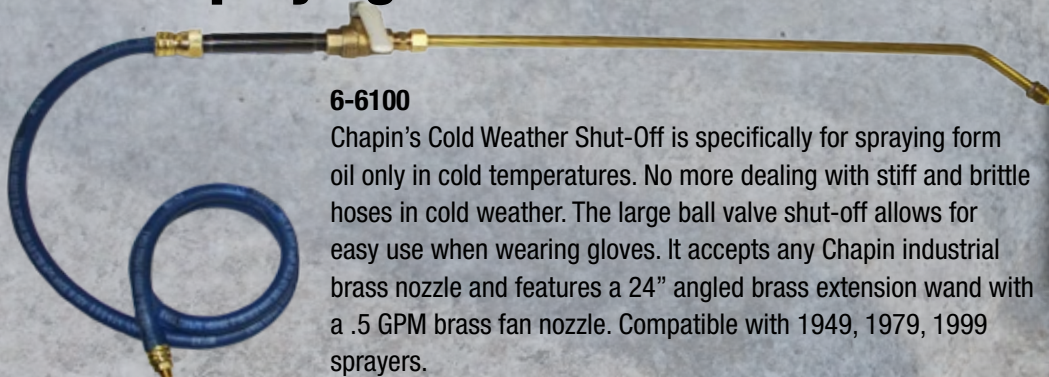

Chapin's Dripless Shut-Off seals at the nozzle tip and eliminates excess buildup in the extension wand that can cause unwanted drips when the shut-off is disengaged. When the trigger grip is released from spraying, the shut-off seals at the nozzle tip keeping the excess product left in the wand from dripping.

6-8135

Professionals can add a dripless shut-off to an existing Chapin Industrial concrete sprayer easily. The 6-8135 Dripless Shut-off is equipped with Xtreme™ seals, a 19" brass wand, machined brass internal parts, ergonomically designed hi-impact plastic grip housing and includes hose barb attachment and standard threaded attachment.

Cold Weather Spraying

6-6100

Chapin's Cold Weather Shut-Off is specifically for spraying form oil only in cold temperatures. No more dealing with stiff and brittle hoses in cold weather. The large ball valve shut-off allows for easy use when wearing gloves. It accepts any Chapin industrial brass nozzle and features a 24" angled brass extension wand with a .5 GPM brass fan nozzle. Compatible with 1949, 1979, 1999 sprayers.
