Packaging made from FSC® Recycled board

Pre-Consumer Recycled Content: Waste material that was created during the process of manufacturing or delivering goods prior to their delivery to consumers.

Post-Consumer Recycled Content: Waste material created by consumers. This material is diverted from landfills and utilized in the production of other commodities.

Recyclability:

Ergonomic Working:

Fellowes **ZONE 1** PREVENT BACK TENSION

Support your back.

A seat cushion, foot rest or back support helps you achieve the correct posture.

How to use a seat cushion

- 1. Check your seat pan:** Adjust your seat to ensure your legs are properly supported but there is enough space to avoid the chair interfering with the bending of the knee. Approx 3 fingers
- 2. Seat Cushion:** Simply place the cushion at the back of your seat and sit directly on the cushion.
- 3. Seating position:** Sit just off upright, so you feel that you are supported by the backrest with your shoulders relaxed. Ensure your seat height is set so your arms are parallel with your desk and your elbows are roughly at a 90° angle. Knees should be level or just lower than your hips with your feet firmly supported on the floor.
- 4. Support your feet:** Don't forget to use a foot support if you can't place your feet firmly on the floor or want to add movement to your day.

Certifications:

Ergonomically assessed for fitness for purpose by FIRA International.

Aftercare:

Cleaning: Covers handwash and air dry only. Do not bleach.

Handling & Storage: Read and follow all instructions and warnings before use. This product is intended for indoor use only.
