Ergonomic Working:

Fellowes ZONE 5 MINIMISE CLUTTER

Keep workspaces clear.
Cable managers, CPU holders and
desktop power products help to organise
your space and work ergonomically.

How to minimise desk clutter

- Declutter:** Move anything that you don't need from your desk where possible. E.g. Mount CPU's under desks or on a monitor arm.
- Zone your desk:** Keep items that you use regularly at the front of your desk and within arms reach when you are sat back correctly in your chair. E.g. keyboard, mouse, wrist rests. Move items you use less frequently further back.
- Make power accessible:** Installing easy to access desktop power products helps to reduce the number of cables around your workspace as well reducing the risk of injury from bending and twisting under desks.
- Organise cables:** Keep cables out of sight and improve accessibility by organising cables in effective cable management systems.

Certification
