Simple but clever

Orthopaedica.

We've Got Your Back.

Orthopaedica is a comprehensive range of ergonomically responsive task seating designed to meet the challenging conditions found in today's commercial environment. Boasting an impressive list of possibilities, Orthopaedica provides the user with the ultimate level of postural support. Sculptured seat and back cushions make it an ideal choice for those with back problems.

Ergonomists and healthcare professionals agree that sitting immobile at work stations for hours on end can lead to poor posture and back complaints. Orthopaedica offers an AirTech seat board that allows the lower back to be supported and at the same time stimulates muscles as you move gently in your working environment. A simple push of the button allows air to flow through a two way valve, this enables the seat to adjust to the fit of your natural shape and deliver a unique, tailor made seat just for you.

"The Orthopaedica task seating range maintains ideal spinal posture via its easy multidirectional adjustments. Suiting the majority of body sizes, the range offers flexible ergonomic seating at a competitive price."

Something For Every Body.

The Orthopaedica seating range offers five principle types, with each variation offering a large selection of optional features.

90Series

100Series

100Series

200Series

300Series

Support Where You Need It.

Robust, practical and built for comfort, the Orthopaedica seating collection is designed to offer maximum support in the most demanding work situations. Orthopaedica assists in reducing back discomfort and enhances well-being to enable the user to work and perform to their best ability. Clearly labelled and easily accessible controls allow the chairs to be adjusted if required and used by different people, without impairing their effectiveness.

Choose Your Features.

2. Fold Down Arms
Fully adjustable fold down arms allow easy access to the workstation.

4. Seat Slide
A sliding seat adapts to different thigh lengths, allowing the user to optimise their own comfort and support.

1. Headrest
The addition of an adjustable headrest supports the user in reclined positions, relieving stress within the neck muscles.

3. Inflatable Lumbar & Thorax
By using the pneumatic pump the lumbar or thorax can be inflated or deflated as required.

5. AirTech Seat Board
A push of the button allows air to flow through the two way valve; this enables the seat to move as you move and moulds to your natural shape.

Orthopaedica.

90SERIES

The 90Series is the original model of Orthopaedica, built with a contoured seat and backrest; it provides high levels of support during prolonged sitting periods. The seat can be further enhanced with the addition of optional features including: seat depth adjustment, inflatable lumbar and thorax and a choice of arm options.

Orthopaedica.

100SERIES

The 100Series offers a wider back for a more encompassing sit. The upholstered outer back creates a softer aesthetic and can be specified in two-tone fabric to create a unique look.

Orthopaedica.

100SERIES

The addition of an adjustable headrest makes the Orthopaedica 100Series a truly adaptable seating solution. Developed to support the user in reclined positions, relieving stress and tension within the neck muscles, this model provides full ergonomic control throughout the working day.

Orthopaedica.

200SERIES

Every individual is unique in their proportions, which is why we developed a range of back heights within the Orthopaedica range. The mid back variation is built with a laminated core; the 200Series is available with an upholstered outer and inner back.

Orthopaedica.

300SERIES

The expansion of the Orthopaedica range has led to the creation of the ultra high back, to offer the ultimate in support and comfort. Developed with a laminated core structure for additional strength, the 300Series features a fully upholstered back.

Support Where You Need It.

Dimensions

Castor Options

Mechanisms

Independent

Independent movement enables the seat and backrest angle to be adjusted separately, with the ability to lock in a fixed position - (will freefloat if lever is left unlocked).

Fully synchronised

Fully synchronised mechanism enables seat and backrest angle to be adjusted to required position. Fixed ratio of 1.8:1 ensures correct ergonomic posture.
