Stainless Steel Lockers

Cleaning & Maintenance

Clean paint work periodically with warm soapy water or foaming cleaner. Oil hinges and lock sparingly as required with a light oil (3in1 or similar).

Locker Construction

General Construction:

- Manufactured from 304 DP1 stainless steel. 1.2mm thick with dull polished satin finish.
- Delivered as a fully assembled unit.
- Pre-drilled carcass for nesting lockers together to complete a run/bank.
- Fitted with standard master cam locks with 2,000 differs or digital keypad locks.
- Single compartment locker fitted with top shelf and coat hook.
- Two-tier lockers fitted with coat hook in each compartment.

Locker Door Construction:

- A door stiffener is spot welded vertically in the centre of the door (except for 6 door units), the door is attached by pop rivets to the right-hand side of the carcass with two 38mm butt hinges and fitted with 10 disc key operated cam lock.

Replacement Locks & Spare Keys

Replacement locks and keys are available from QMP.
Replacement keys are available from Fast Key Ltd.
