LAUNDRY STAIN REMOVING LIQUID

- Kills all gram positive and gram negative bacteria
- Tackles difficult to remove stains
- Hypochlorite based formulation

USES

A liquid destaining additive with bactericidal properties for heavily stained fabrics. Add to the sluice wash phase for enhanced cleaning results.

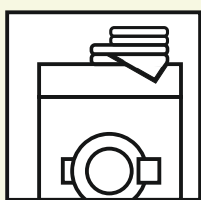

Designed to penetrate and break down stains, allowing Laundry Detergent to remove the stain from the fabric more effectively during the main washing cycle.

For use in conjunction with Laundry Detergent in automatic washing machines.

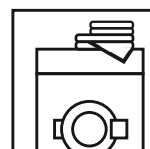

DIRECTIONS

Never put undiluted Destainer onto fabrics. Always pre-dilute or feed through Clover Ultra Care dispensing equipment. Always wash and rinse fabric after using *Laundry Stain Removing Liquid*.

N.B. Do not use with woolen and silk items. Always consult the garment label for compatibility with hypochlorite bleach formulations. Coloured fabrics can fade when used with destaining products.

AREAS OF USE

Washing Machines

DILUTIONS

LAUNDRY STAIN REMOVING LIQUID : WATER	
Heavy soilage 1:150	Bactericidal 1:800
