Alcohol Range:

• **70% IPA FLOW WIPES**

- Available in Pack of 50 (Size- 190mm*170mm)
- Available in Pack of 70 (Size- 190mm*170mm)
- Available in Pack of 100 (Size- 190mm*170mm)
- Available in Pack of 200 (Size 220mm*200mm)

Description A white nonwoven fabric pre-saturated with 70% Isopropyl alcohol (IPA) solution. 70% IPA is simple and the most effective formula which efficiently kills most surface microorganisms, highly recommended for the disinfection of non-invasive instruments used in the medical area.

Features 2 in 1 use – cleaning and disinfection of hand and non-alcohol sensitive hard surfaces. Quick, convenient, and effective Single use wipe - no cross-contamination Plastic cap lock system to seal moisture

Technical details Kills 99.999% of bacteria within 5 minutes and >99.99% kill rate against all enveloped viruses including Coronavirus (MERS-CoV, SARS-CoV-1, SARS-CoV-2) in 30 seconds.

According to European standard tests: EN 14561, EN 13727, EN 1276, EN 1650, EN 14476.
Applications Excellent cleaning and disinfection of hand and multiple hard surfaces. Recommended for amateur and professional user.

● 70% IPA PROBE/SMALL TUB WIPES

- Available in tub of 100 (Size- 125mm*125mm)
- Available in tub of 150 (Size- 125mm*125mm)
- Available in tub of 200 (Size- 125mm*125mm)

Description A white nonwoven fabric pre-saturated with 70% Isopropyl alcohol (IPA) solution. 70% IPA is simple and the most effective formula which efficiently kills most surface microorganisms, highly recommended for the disinfection of non-invasive instruments used in the medical area.

Features 2 in 1 use – cleaning and disinfection of hand and non-alcohol sensitive hard surfaces. Quick, convenient, and effective Single use wipe - no cross-contamination Plastic cap lock system to seal moisture.

Applications Excellent cleaning and disinfection of hand and multiple hard surfaces. Recommended for amateur and professional user.

- **Single sachet wipes 100 per box**

The purpose of IPA Surface Disinfectant Sachet Wipes is to disinfect surfaces quickly. Isopropyl Alcohol (IPA) is the principal active component, which is widely known for its ability to kill microbes quickly. The disinfectant composition also kills a diverse range of bacteria, yeasts, and moulds. IPA is used in healthcare facilities across the world for qualified healthcare disinfection.

- ✓ Manufactured to exacting standards in the United Kingdom
- ✓ Surface disinfection as quickly as possible using a professional healthcare standard Isopropyl Alcohol, 70% Isopropyl Alcohol, 70% Isopropyl Alcohol
- ✓ Viruses that are encapsulated are killed (COVID-19 family) quickly
- ✓ Hospitals, clinics, GP practises, dental practises, nursing, and care homes are all places where professional healthcare is provided.
- ✓ Suitable for workstations, toilets, workbenches, kitchens, high touch surfaces (such as door handles), toilet seats, taps, supermarket trolleys and baskets, as well as in and away from home.
- ✓ Wipes outperform gels in terms of disinfection.

- **Medisanitize Antibacterial 500 ML IPA spray**

All the products are available in BLUE/WHITE Colour fabric.

NON- Alcohol Range

- **UNIVERSAL FLOW WIPES**

- Available in Pack of 50 Wipes (Size- 190mm*170mm)
- Available in Pack of 70 Wipes (Size- 190mm*170mm)
- Available in Pack of 100 Wipes (Size- 190mm*170mm)
- Available in Pack of 200 Wipes (Size 220mm*200mm)

Description- An alcohol-free competent product contains a non-woven fabric pre-saturated with an aqueous disinfectant solution containing a blend of high-grade biocides efficiently acting against the microbes including bacterial spores and bacteria developing resistance.

Features 2 in 1 use – cleaning and disinfection. Quick, convenient, and effective. Single use wipe - no cross contamination.

Technical details ≥99.9999% kill rate against bacteria including MRSA and Mycobacteria. Kills at least 99.999% of Clostridium difficile spores within 5 minutes. 99.999% kill rate against Legionella

pneumophila and Fungi. Yeasticidal with 99.9999% kill rate. Effective against all enveloped viruses including Coronavirus.

According to European standard tests: EN 1276, EN 1656, EN 13623, EN 13697, EN 13727, EN 13704, EN 14348, EN 1650, EN 1275, EN 14476.

Applications Excellent cleaning and disinfection of hand and multiple hard surfaces. Recommended for amateur and professional user.

● **Universal Probe TUB WIPES**

- Available in tub of 100 Wipes (Size- 125mm*125mm)
- Available in tub of 150 Wipes (Size- 125mm*125mm)
- Available in tub of 200 Wipes (Size- 125mm*125mm)
