TYPEPART LIMITED

31st March 2016

Dear Dennis

Further to your recent request regarding our product 35985 (4 in 1 Stylus, Laser, LED & Pen).

This is a class II laser product that has been tested to EN 60825 Safety of Laser Products and is marked with the appropriate warning "Laser Radiation Do Not Stare Into Beam" and "Keep out of reach of children"

There are no adverse effects anticipated from normal use. The most likely effects of viewing the beam from a laser pointer are afterimage, flash blindness and glare. Flash blindness is temporary vision impairment after viewing a bright light.

Safe handling precautions

- Never point a laser beam at a person
- Never look directly into the laser beam
- Do not aim the laser at reflective surfaces
- Never view a laser pointer using an optical instrument, such as binocular or a microscope
- Do not allow children to use laser pointers unless under the supervision of an adult

If you require any further information, please let me know.

Regards

Ronan Tod
