

# FLOOR MAINTAINER

Marble • Vinyl • Rubber • Stone • Sealed Wood

## USES

*Floor Maintainer* is a floor maintainer that recoats and repairs floors to leave a flexible, slip resistant finish. Keeps floors at the peak of their appearance and restores those that are losing their shine.

The fragrant, low viscosity, opaque, rose-coloured liquid can either be applied with a mop and left to dry or used through spray cleaning equipment.

Suitable for use on marble, terrazzo, linoleum, vinyl, rubber, tiles, sealed wood and sealed cork.

## DIRECTIONS

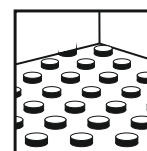

Shake before use and dilute according to the job. Always brush floor to remove loose debris prior to application. Clean heavily soiled floors prior to application.

**SPRAY CLEANING/BURNISHING** - Spray *Floor Maintainer* solution onto the immediate floor area. Allow a few seconds contact time and burnish the floor dry.

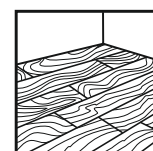

**DAMP MOPPING** - Apply *Floor Maintainer* solution using a mop, agitate and remove any excess liquid. Allow the floor to dry. Machine burnish for a high gloss.

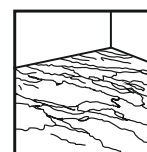

## AREAS OF USE

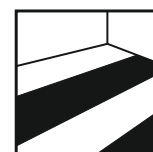

Rubber

Wood

Marble

PVC

## DILUTIONS

FLOOR MAINTAINER:WATER	SPRAY BURNISHING 1:10	DAMP MOPPING 1:20
