STERISTIK PRODUCTS

DOOR PUSH COVERS

We offer pre-cut push door covers which can easily be applied to your swing doors and come in numerous sizes depending on your needs. Ideal for:

- Door Push Plates
- High Level Kick Plates (Storeroom Doors)

LARGE ROLLS

Our most popular choice of SteriStik comes on a roll which has a standard size of either 220mm or 330mm wide and 25 metres long making it suitable for covering larger surface areas. Ideal for:

- Tables/Desks
- Worktops
- Large Flat Surfaces
- Self Checkout
- Weighing Scales
- Storeroom Doors

SMALL TAPE

Our tape is 75mm wide and 25 metres long allowing you to easily apply to smaller surfaces in your workplace. Ideal for:

- Stair Rails
- Vertical Door Pulls
- Customer Bathroom Areas

INSTALLATION

FITTING SERVICE

If you decide to use our fitting service we can arrange for our team to install SteriStik in your workplace at a convenient time for you. Our team will leave a highly professional finish on all of your covered surfaces.

SELF-INSTALLATION

For those opting to install SteriStik themselves, we make this process as easy as possible for you, providing you with a full installation guide and video demonstrations to help get you started. A brief guide is listed below.

STEP 1

Choose your high touch surfaces you wish to cover and place your order (our team can help with the quantities you may require)

STEP 2

Once your order arrives you are ready to install in your workplace. Wipe down all high touch surfaces to remove any dust or dirt which may cause bumps or air pockets in your application.

STEP 3

Cut the desired amount of cover for your selected area. Peel the backing and apply the cover to your surface and firmly press and brush across using the applicator provided.

TIP

You can always remove the area you have covered and re-apply if necessary. Having two people to install SteriStik will make the application much easier to ensure you get a smooth finish on all of your surfaces.

FAQ'S

WHAT IS STERISTIK?

A self-adhesive cover which has antimicrobial properties to proactively kill 99.9% of bacteria throughout the day which can be applied to any surface within your business to protect your customers and staff

DO I NEED TO CLEAN THE COVERS?

Yes. Although SteriStik's compound stops bacteria being able to survive on the surface, this does not stop the need for regularly cleaning surfaces. Adding that extra layer of protection to your products acts as a complementary measure to routine cleaning.

HOW LONG DOES STERISTIK LAST?

We can guarantee that the antimicrobial properties embedded into SteriStik last a minimum of 4 months, giving you a long lasting protection on your desks, handles, bannisters and other surfaces within the workplace.

CAN I INSTALL STERISTIK MYSELF?

Yes you can easily install the covers yourself and you be supplied with a guide on how to apply this to your surfaces with video instructions and online support if needed, by our team.

For larger installations we recommend using our experienced fitting team to ensure you get an efficient and professional finish.

WHAT COLOUR ARE THE COVERS?

Our covers come as standard in either a white or clear material with our logo visible throughout. We also offer bespoke branding options at an additional cost for those wishing to use SteriStik to enhance their brand throughout their business.

HOW DOES STERISTIK WORK?

SteriStik is embedded with silver ion technology which is what kills the bacteria. The silver ions attack the bacteria DNA inhibiting it to reproduce and eventually killing it. The silver ion technology used has been used for over 18 years in other products to kill bacteria.
